SDTA

Swiss Donation Transplant Association

6th Symposium

Swiss Donation & Transplant Association

5th February 2016

10:00 – 12:00

Congress Hotel Seepark Thun

HeartWare

SANOFI

Swiss Donation & Transplant Association

The SDTA was founded in 2008 by the members of the Local Organizing Committee, with the benefits of the European Transplant Coordinators Organization (ETCO) congress in Geneva 2005, under the presidency of Prof. Peter Suter.

The association is registered in Geneva.

The goals of the association are to:

- promote organ & tissue donation and transplantation in Switzerland.
- encourage exchange between the health professionals implicated in organ & tissue donation and transplantation.
- support educational projects

Marie Garside: I have been a Specialist Nurse in Organ Donation since 2009 and a Team Manager since May 2015. She is a registered nurse, qualified in 1990 and prior to joining the Organ Donation Service. She was a Senior Nurse and Emergency Nurse Practitioner in Accident and Emergency services for 15 years

Prof. Christian Latrémouille is a heart surgeon at the Georges Pompidou European Hospital in Paris. In 1995, he became head of the heart transplant program and consequently joined the development program of CARMAT, for the total artificial bioprosthetic heart. Since a decade he has collaborated with a team of engineers; he conducted the animal studies in the preclinical phase that enabled him to make the first human implantation and to conduct the first clinical study as a principal investigator

PD Dr. med. Franz F. Immer, Cardiovascular Consultant, CEO, Swisstransplant, Bern

Supporters:

The Swiss Donation & Transplant Association wish to thank **Astellas® Pharma**, **HeartWare®**, **Novartis®**, **IGL Group®** and **Sanofi®** for their support for this symposium.
